Approval and Promulgation of State Implementation Plan; Michigan; Site-Specific SIP Revision for the Enamalum Corporation

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The EPA proposed to approve a revision to the Michigan State Implementation Plan (SIP) for ozone that was submitted on August 26, 1994. This revision is a site-specific SIP revision that determines the appropriate reasonably available control technology (RACT) level for volatile organic compound (VOC) emissions from the Enamalum Corporation Novi, Michigan facility. This proposed approval of the site-specific SIP revision, submitted by the State of Michigan, would allow for a limit higher than that found in the control technology guidance (CTG) document for this source category. This proposed approval is based upon the argument that the Enamalum Corporation facility cannot afford the controls normally required by the State's RACT rule. In the final rules of this Federal Register, the EPA is approving this action as a direct final rule without prior proposal because EPA views this as a noncontroversial action and anticipates no adverse comments. If no adverse comments are received in response to that direct final rule, no further activity is contemplated in relation to this proposed rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period on this action. Any parties interested in commenting on this document should do so at this time.

DATES: Comments on this proposed action must be received by March 22, 1996.

ADDRESSES: Written comments should be sent to: Carlton T. Nash, Chief, Regulation Development Section, Air Toxics and Radiation Branch (AT-18J), EPA, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604-3590.
